## DUROSTICK YACHT CLEANER

Strong cleaner for boats with active ingredients

#### PROPERTIES

Active and low foaming, alkaline cleaning agent that removes persistent stains from oils and grease, grime and soot. With just one spray, it removes ink from cuttlefish and squid (often occurrence when seagulls soil boat decks with ink while eating them), even when it penetrated through the pores of the surface. Removes hard sediment and microorganisms from boat hulls as well as seagull waste.

#### APPLICATIONS

DUROSTICK YACHT CLEANER is necessary for the general plastic boat cleaning. It revives and restores the original bright white color of gel coat. It deeply cleans and removes scum, black spots and yellow stains from upholstery and boat fenders as well. Ideal for cleaning lavatories and showers, faucets and sinks as well as plastic tables, chairs and tarps.

#### USE

DUROSTICK YACHT CLEANER is a very powerful cleaning agent. During application and even rinsing, the use of protective gloves is deemed necessary to avoid skin irritation. For spot cleaning, spray from a distance of 25cm. Allow for the product to act for 2-3 minutes. Following, remove the residues with a wet sponge or rinse with plenty of water. For general boat cleaning, dilute the product in a bucket with clean water, at a ratio of 1:1. Use the solution to soak the surfaces. It is recommended to use a short pile stiff broom for easy scrubbing and effective cleaning. Rinse with plenty of water before the cleaner dries on the surfaces. Caution: After the cleaner is applied on colored gel coat and sensitive surfaces, it has to be rinsed with water within the next 30 seconds.

#### LIMITATION OF USE

It is not recommended for cleaning brass and bronze surfaces.

The technical specifications and directions of use contained in this technical brochure are the results of the knowledge and experience of the company's research and development department, as well as from the real-life applications of the product. The recommendations and suggestions regarding the use of the products are made without guarantee since the respective conditions during their application are beyond the control of the company. For this reason, it is the user's responsibility to make sure that the product is suitable for the intended application as well as the application conditions of the project.
